Competition Format and Rules

As of MON 22 JAN 2024

Youth Olympic Competition Format

Seven different freestyle skiing disciplines are on the schedule at the Winter Youth Olympic Games Gangwon 2024: dual moguls, ski cross, freeski halfpipe, freeski slopestyle, freeski big air mixed team dual moguls and mixed team ski cross.

Differences between the FIS Junior World Championships and the Winter Youth Olympic Games

There are no major competition format differences between the FIS Junior World Championships and the Winter Youth Olympic Games.

Changes since the Winter Youth Olympic Games Lausanne 2020

Team ski-snowboard cross has been removed from the programme. Men's and women's dual moguls, mixed team dual moguls and mixed team ski cross have been added to the programme.

Dual Moguls

Youth Olympic Competition Format

There are two events in dual moguls (DM): men and women. Each event consists of two phases: group heats (qualification) and finals. Bib numbers are assigned based upon the FIS Seeding List.

The competition consists of group heats (four panels), semifinals, small final and the big final, divided into heats of up to five competitors.

In the group heats each competitor in the same pool competes against all others in a round robin scheme. Points are awarded in each heat based upon rank as follows: 1st=3 pts, 2nd=2 pts, DNF=1 pt, DNS=0 pts.

The best competitor from each panel of group heats will qualify to the semifinals.

The winners of the semifinals advance to the big final and the other competitors advance to the small final.

Each heat is scored by seven judges.

Sport Rules and Procedures

Mogul skiing is a judged event and also uses the objective measurement of time. Competitors ski down a steep (28 degree), 250 metre long by 20 metre wide course covered in snow bumps or "moguls," and perform two different jumps off air bumps. They are judged on the technical quality of their turns, the performance of the two jumps and are awarded points for time.

Mogul skiing calls for aggressive, fast turns, directly down the fall line of the course, using good absorption and carving technique. Competitors choose their own line down the course and perform two different jumps of their choice on specially constructed jumps known as "air bumps." The jumps add individuality and flair to the runs and consist of single or multiple positions, grabs (where the hand grabs the skis), flips and rotations.

Judging

Each heat is scored by seven judges. Four judges scoring turns, two judges scoring air and one judge scoring time difference.

Tie Break Rules

Should a tie occur, the competitor with the greater number of votes from the Turns judges shall be ranked higher; if still tied, the competitor with the greater number of Turns judges in favour shall be ranked higher. If still tied, the Turns Tie Break Judge shall determine the result by giving a Turns score.

Penalties / Disqualification Rules

Competitors will be marked as Did Not Finish (DNF) if they ski around the control gates lining the course, lose a ski or do not cross the finish line.

Competitors will be marked as Did Not Start (DNS) for no show.

If a competitor is marked as DQB at any point, he is not allowed to continue in the competition and will be listed last of the event unit in which the DQB occurred.

Protests / Appeals

Protests must be submitted in writing to the jury within 15 minutes of the end of the competition, accompanied by a fee in CHF (according to the rules), which will be refunded if the protest is accepted. The jury, consisting of the Chief of Competition, Technical Delegate and head judge, along with one jury advisor, will rule on the protest.

Mixed Team Dual Moguls

Youth Olympic Competition Format

Each team has two members. Each team can have up to one reserve athlete per gender. Reserves have to be defined before the draw meeting and can be activated (if the other team mate is unable to participate) up to 30 minutes before the start of the competition.

The Mixed Team Dual Moguls (DMT) consists of qualification (pre-heats) and finals.

Sport Rules and Procedures

The competition consists of a final phase only. Teams will be seeded based on the sum of the team members individual FIS Seeding Ranks. If two or more teams are tied, their seeding will be determined by a random draw. The best 16 seeded teams are directly seeded in the 1/8 finals bracket. If there are less than 16 teams, the teams without opponents do not participate in the 1/8 finals and go directly to the quarterfinals. If there are more than 16 teams, pre-heats will decide who goes to the 1/8 finals.

Teams compete in heats, with the winning team advancing to the next round. In each round, every team takes part in one heat according to the start list as per the knockout ladder.

In a mixed team competition, women shall compete against women and men against men. The lower seeded team must be the first to designate which competitor will compete in the first run of a heat.

The scores from each team will be added together to create a total team score for each heat. Ranks one to four are determined from the results of the big and small finals. All other teams are ranked according to their total team score in each round. The official results will include all the team members and substitutes entered in the competition, and their scores.

Judging

Each heat is scored by seven judges. Four judges scoring turns, two judges scoring air and one judge scoring time difference.

Tie Break Rules

In case of a tie in a heat, the team with the higher combined turns scores shall win the tie

If still tied, the team with the greater number of turns judges deciding in favour of its team members shall win the tie

If still tied, the team with the higher combined air scores shall win the tie

If still tied, the team with the greater number of air judges deciding in favour of its team members shall win the tie

If still tied, the team that won the second run of the heat shall win the tie

Penalties / Disqualification Rules

Competitors will be marked as Did Not Finish (DNF) if they ski around the control gates lining the course, lose a ski or do not cross the finish line.

Competitors will be marked as Did Not Start (DNS) for no show.

If a competitor is marked as DQB at any point, the team is not allowed to continue in the competition and will be listed last of the event unit in which it happened.

Protests / Appeals

Protests must be submitted in writing to the jury within 15 minutes of the end of the competition, accompanied by a fee in CHF (according to the rules), which will be refunded if the protest is accepted. The jury, consisting of the Chief of Competition, Technical Delegate and head judge, along with one jury advisor, will rule on the protest.

Ski Cross

Youth Olympic Competition Format

There are two events in ski cross (SX): men and women. Each event consists of two phases: group heats (qualification) and finals. A specially prepared course of jumps, turns, roller sections and banks test the competitors' skills. Bib numbers are assigned based upon the FIS Seeding List. A start gate is used to allow the competitors to enter the course.

The competition consists of group heats (two panels), semifinals, small final and the big final, divided into heats of up to four competitors.

In the group heats each competitor in the same pool competes against all others in a round robin scheme. Points are awarded in each heat based upon rank as follows: 1st=4 pts, 2nd=3 pts, 3rd=2 pts, 4th=1 pt.

The top four competitors from each panel of group heats qualify to the semifinals.

The top two competitors from each semifinal advance to the big final and the other competitors advance to the small final.

Ranking at the finish of a heat is determined by the order of crossing the finish line. If more than one competitor fails to complete the course by crossing the finish line, the competitor who made it further down the course will receive the higher rank.

If two or more competitors cross the finish line simultaneously, the ranking will be determined by the first part of the body or ski that crosses the finish line.

Sport Rules and Procedures

Based upon the ranking in the FIS Seeding List, each competitor will be given a seeding number which decides where the competitor is placed in the two panels of group heats.

Start gate lane choice for each heat is based on the competitor's seeding number.

A missed start is considered as DNS (Did Not Start). It is the competitor's responsibility to arrive at the start in time to compete in the next heat.

Additionally, competitors wear a coloured bib (red, green, blue and yellow) attributed before each start according to their bib number, with the best competitor being given red and the first lane option, second best green, etc.

Final Ranking: The competitors in the big final are ranked according to their finish order. The competitors in the small final are ranked 5th-8th by finish order. If the small final is not competed, losers of the semifinals are ranked first by their placing (3rd, 4th) then according to their seeding rank within their group.

Rankings 5-12 from each panel of group heats are ranked by their rank in their panel then according to their group heats points within their group.

Tie Break Rules

Group Heats: In case of an unbreakable tie in a heat, all competitors will receive the same number of points.

Unbreakable tie for qualifying place(s) after the group heats:

- In case of a tie between two competitors, the competitor who had the higher rank in their common heat will be ranked first. If they remain tied, the competitor with the higher seeding rank will advance.
- In case of a tie between three or more competitors, the tie will be broken based upon their seeding rank.

Semifinals: In case of an unbreakable tie for qualifying place(s) in the heats, the higher ranked competitors on the FIS Seeding List will advance.

Big Final: In case of an unbreakable tie in the big final or small final), they will remain tied

Penalties / Disqualification Rules

The penalties are: Did Not Start (DNS) for no show, Did Not Finish (DNF) for not crossing the finish line or missing a gate, Not Permitted to Start (NPS), Ranked As Last (RAL) for not complying with the rules and Disqualified for unsportsmanlike behaviour (DQB).

If a competitor is disqualified due to unsportsmanlike behaviour (DQB), his or her results from the entire competition will be removed and he or she will be listed at the bottom of the classification with no final ranking.

Protests / Appeals

Competitors marked as DQB will be announced and/or posted immediately after each heat at a designated area at the bottom and top of the course. Competitors may ask for a review of the heat, to the FIS representative directly after the end of the heat. Reviews after this time will not be accepted.

The jury will consist of the TD, chief of competition and the referee.

Mixed Team Ski Cross

Youth Olympic Competition Format

Each team has two members. Men start first and women second.

The Mixed Team Ski Cross (SXT) consists of qualification (pre-heats) and finals.

The pre-heats, quarterfinals, semifinals, big final and small final are divided into heats of up to four teams. The bib numbers correspond to the teams' seeding rank (based on the sum of the FIS points of each team member).

Sport Rules and Procedures

Each team member will make one run - following each other as a relay. A classical cross start sequence is given for the wave 1 (men's run) - all start doors open simultaneously. When the results of wave 1 are confirmed, start doors will open for the wave 2 (women's run) with a delay corresponding to the wave 1 results. The maximum time delay between the first competitor crossing the finish line and the rest of the competitors from the same heat, is limited by the penalty time. This time is calculated according to FIS rules. The first two teams whose second teammate crosses the finish line will advance to the next round.

If there are more than 16 teams entered, pre-heats will be organised with two teams progressing from each pre-heat to the quarterfinal (e.g. if 20 teams are entered, eight teams will go through pre-heats and four qualify to the quarterfinals).

The penalty time will be announced to the teams during the Team Captains' meeting.

Tie Break Rules

During the pre-heats, quarterfinals and semifinals, only ties for second place are broken, using the seeding order of the team, with the best seeded team being ranked first (lowest bib number). If more than two teams cannot finish, the team which completes the longest distance will progress. If they are still tied, the best seeded team will progress.

During the small final and the big final: Unbreakable ties remain.

Penalties / Disqualification Rules

The penalties are: Did Not Start (DNS) for no show, Did Not Finish (DNF) for not crossing the finish line or missing a gate and Disqualified for unsportsmanlike behaviour (DQB).

If a team is Disqualified due to unsportsmanlike behaviour (DQB), its results from the entire competition will be removed and the team will be listed at the bottom of the classification with no final ranking.

Warnings, yellow and red cards:

Contact in cross is common and can lead to a warning, a Yellow Card (RAL) or a Red Card (DSQ). Sanction for a determined interference shall be decided using the Guidelines of Intentional Contact (can be found on the FIS Website).

A warning and a system of coloured cards (Yellow Card and Red Card) is used to show the interfering competitor's degree of sanction.

If the competitor receives a second official warning during the same competition, it will automatically turn into a Yellow Card (RAL).

A competitor who receives a Yellow Card sanction will be ranked as last (RAL) in their heat. If a competitor receives a yellow card, the team is not allowed to continue in the competition.

All jury decisions regarding Interference must be confirmed prior to the start of a next heat, and cannot be protested.

Protests / Appeals

Teams marked as DQB will be announced and/or posted immediately after each heat at a designated area at the bottom and top of the course. Teams may ask for a review of the heat, to the FIS representative directly after the end of the heat. Reviews after this time will not be accepted.

The jury will consist of the TD, chief of competition and the referee.

Freestyle Halfpipe and Freestyle Slopestyle

Youth Olympic Competition Format

There are two events in both freestyle halfpipe (HP) and freestyle slopestyle (SS): men and women. The freestyle halfpipe and freestyle slopestyle competitions are judged sports. Each competitor performs individual runs with several tricks, spins and flips.

There will be two runs in the qualification and three runs in the final. The best run is taken in account.

Qualification: The qualifications will consist of one or two heats. Each heat includes two runs. If there is one qualification heat, the 12 best competitors will advance to the final. If there are two qualification heats, the x best competitors from each heat and the y best results from the combined ranking of the heats will advance to the final (e.g. x=4, y=4 or x=5, y=2 or x=6, y=0).

Final: There will be 12 competitors in the final. They will be ranked according to the best of three runs.

Alternate formats: In the unlikely case that the event must be run faster (e.g. due to weather conditions or force majeure), alternate formats could be used (for example there could be no qualification, the final could be reduced to two runs, qualification with two heats and double-up judging).

Sport Rules and Procedures

The halfpipe is a snow pipe with a length of about 160 metres (525 feet), an average width (wall to wall) of about 18 to 20 metres (49-66 feet) and an average gradient of about 18 degrees. The concave walls of "Oversized Pipes" are up to 6.5 metres (22 feet) in height.

The slopestyle course is made up of six distinct sections: three rail (or "jib") features, and three jump features. The three rail features come at the start of the course, while the three jump sections will close out the competitors' runs. In halfpipe and slopestyle, the competitors will be judged on a combination of amplitude, technical difficulty, creativity and landings.

If a competitor does not start in any run, they are marked as DNS.

Qualification: the start order is based on the ICR (e.g. groups, zigzag) using the FIS Seeding List.

Final: the start order for the final is in reverse order of the results of the qualification.

Final ranking: All competitors who competed in the final are ranked first, followed by competitors who did not advance from the qualification.

Judging

The judging panel consists of six international judges who evaluate a competitor's performance according to the overall impression of the runs. The highest and lowest scores are discarded, and the four remaining scores are averaged for each run.

The judge evaluates the sequences of tricks, the amount of risk in the routine, and how the competitor uses the pipe.

Tie Break Rules

The judges will break ties, if any.

Penalties / Disqualification Rules

If a competitor is disqualified due to unsportsmanlike behaviour (DQB), his or her results from the entire competition will be removed and he or she will be listed at the bottom of the classification with no final ranking.

Protests / Appeals

Protests must be made in writing to the Jury within fifteen minutes of the end of the competition. The protest must be accompanied by a fee of CHF 100, which is refunded if the protest is upheld.

No protest against the judging is allowed.

Freeski Big Air

Youth Olympic Competition Format

The freeski big air competition is a judged sport. The competitors perform tricks on the BA jump by taking off from a kicker and aiming to attain sizable airtime, well executed tricks all while securing a clean solid landing. The competition format is based on two jumps in the qualification and three jumps in the final. The best jump counts in the qualification. The two best different jumps count in the finals.

There are two events in freeski big air (BA): women and men.

Qualification: The qualifications will consist of one or two heats. Each heat includes two runs. If there is one qualification heat, the 12 best competitors will advance to the final. If there are two qualification heats, the x best competitors from each heat and the y best results from the combined ranking of the heats will advance to the final (e.g. x=4, y=4 or x=5, y=2 or x=6, y=0).

A competitor who is Disqualified (DSQ) in jump 1 is not permitted to start in jump 2.

Final: There will be 12 competitors in the final. They will be ranked according to their two best jumps of three.

Alternate formats: In the unlikely case that the event must be run faster (e.g. due to weather conditions or force majeure), alternate formats could be used (for example there will be no qualification, the final could be reduced to two jumps, qualification with two heats and double-up judging).

Sport Rules and Procedures

The freeski big air course has an in-run approximately 38-45 metres high and a kicker approximately 4 metres high. The landing pitch is approximately 35-38 degrees. The distance to fly from the kicker to the sweet spot on the landing is around 22-30 metres.

Qualification: the start order is based on the ICR (e.g. groups, zigzag) using the FIS Seeding List.

Final: the start order for the final is in reverse order of the results of the qualification. There may be a new start list for jump 3 which will be in reverse order of the results after two jumps.

Final ranking: All competitors who competed in the final are ranked first, followed by competitors who did not advance from the qualification.

Judging

The judging panel consists of six international judges who evaluate a competitor's performance according to the overall impression of the jumps. The highest and lowest score are discarded and the four remaining scores are averaged for each jump.

The judge evaluates the amplitude, the difficulty of the trick, execution, progression and landing. The judges take falls into consideration and can deduct up to 30% of the points of the jump per judge for each fall.

Tie Break Rules

The judges will break ties, if any.

Penalties / Disqualification Rules

If a competitor is disqualified due to unsportsmanlike behaviour (DQB), his or her results from the entire competition will be removed and he or she will be listed at the bottom of the classification with no final ranking.

Protests / Appeals

Protests must be made in writing to the Jury within fifteen minutes of the end of the competition. The protest must be accompanied by a fee of CHF 100, which is refunded if the protest is upheld.

No protest against the judging is allowed.

Progression system: In the Group Heats all competitors compete in four pools with heats against each other (round robin). Competitors are awarded race points according to their finishing position in each heat (the winner is awarded 3 points second is awarded 2 points). The first ranked competitor in each pool proceeds to the next phase. In the Semifinals the first ranked competitor in each heat proceeds to the Big Final. The second ranked competitor in each heat proceeds to the Small Final.

Note:
All competitors are seeded according to their FIS Seeding Rank.

Progression system: In the Group Heats all competitors compete in four pools with heats against each other (round robin). Competitors are awarded race points according to their finishing position in each heat (the winner is awarded 3 points second is awarded 2 points). The first ranked competitor in each pool proceeds to the next phase. In the Semifinals the first ranked competitor in each heat proceeds to the Big Final. The second ranked competitor in each heat proceeds to the Small Final.

Note:
All competitors are seeded according to their FIS Seeding Rank.

Progression system: In the Group Heats all competitors compete in two pools with heats against each other (round robin). Competitors are awarded race points according to their finishing position in each heat (the winner is awarded 4 points irrespective of the number of starters). The first four ranked competitors in each pool proceed to the next phase. In the Semifinals the first two ranked competitors in each heat proceed to the Big Final. The third and fourth ranked competitors in each heat proceed to the Small

Note:

All competitors are seeded according to their FIS Seeding List Rank.

Note:
In Big Air the best 2 out of 3 jump format requires that the two scored tricks must be different. If a competitor performs the same trick twice or more during the same phase, only the highest score will count, and lower scores will not be considered. In order to differentiate between the different tricks they will be indicated with Jump IDs (JI): A, B or C.

For further information on Trick IDs, please consult: <https://www.fis-ski.com/DB/freeski-freeski/freeski/trick-list.html>

Sport Terminology

As of MON 22 JAN 2024

Dual Moguls and Mixed Ski Dual Moguls

Term	Definition
Air	A jump in the mogul run in which the competitor uses to perform jumps. Two airs are required in each moguls run.
Air Bump	A specially constructed jump that has been set in the mogul course.
Backscratcher	Competitor touches his/her back with the tail of both skis. The knees bend under the body, the shoulders and hips have to lean back to avoid falling forward.
Body Position	The stance, balance and movement of the competitor's body.
Carving	Technique of edging the skis through turns to control speed. Efficient use of edging to control speed in and out of the turns during a run.
Control Gate	A series of 10 equally spaced gates set on the mogul course.
Cross	The crossing of the skis in an "X".
Fall line	An imaginary line that follows the steepest gradient down a slope. (i.e. the path a rolling ball would follow down the slope).
Grab	In a jump, the competitor reaches and holds a part of the ski for a duration of time. Performing a grab results in a higher degree of difficulty.
Helicopter	An upright aerial spin of 360 degrees.
Inverted Jumps	These jumps consist of either flips or loops. These jumps can also have twists, positions or grabs.
Loop	A rotation around the central axis "sagittal" of the body.
Mogul	A roll or ridge of snow caused by competitor traffic.
Mule Kick	A 90-degree drop of the skis with a 45-degree twist to the side. The tips drop but the heels are kicked out to one side.
Multiple Manoeuvres	Any combinations of trick(s). An example is a Double Daffy, a Daffy Twister Spread or an Off-Axis with two positions.
Off-Axis	A titled rotation to one side of the vertical axis, which is the results of a forwards and sidewise or backwards and sidewise leaning during the take-off of a 360 or 720 jump.
Pace Time	Is a calculated value which is different for men and women. To calculate the pace time take the course length in metres then divide it by the pace time value.
Position	In a jump, the competitor can create a position, like crossing the skis, for a duration of time. Performing a position results in a higher degree of difficulty.
Reverse trough	The technique of skiing on top of the moguls and turning in the opposite direction of the ruts.
Ruts	The deep area between moguls.
Speed	The time it takes the competitor to complete the course is worth 25% of their final score.

Term	Definition
Spread	Competitors arms are extended and legs split apart to the side. The upper body remains upright with ski tips and tails even and parallel.
Trough	Ruts, or a deep path through the moguls.
Turns	Consistent changes in direction of travel to either side of the fall line.
Twister	Skis twist 90 degrees to one side of the body, hands and body twist to the opposite side.
With Position	The addition of a position to a jump, e.g. "360 with Position".

Freeski Halfpipe, Freeski Slopestyle and Freeski Big Air

Term	Definition
Airtime	Time spent not in contact with the earth.
Apex	Crest of the turn; top of the arc above a pipe.
Approach	1. The in-run and line to a feature. 2. The movements and tactics a rider uses before reaching the take-off zone of a feature. Areas in the park and pipe designed for setting speed and preparing to use a feature.
Backside Hips	Hitting a hip backside requires around 45-100 degrees of backside rotation. It looks and feels somewhat like a backside air in the halfpipe. However, the take-off can be a little tricky. Depending on the shape of the take-off, a Backside air is often done slightly off the toes. This is due to the fact that the rider must take-off towards the landing, which is to the side and may require a toe take-off. This seems a little weird at first, but it can get comfortable.
Banks	A bank of snow that may be used to turn against and direct the flow of traffic, and may have a box or jib on its top edge to jib or slide.
Basin	Enclosed bowl in the shape of a bowl or spoon-shaped.
Berms	A berm is like a bank except that it has a more defined turn and arcing shape. Used in motocross, the berm translates directly to the boardercross course. The Mount Baker Banked Slalom, is a good example of riding berms. It is a berm contest and very cool.
Boost	Developing big air off a take-off. Most commonly associated with boosting out of the pipe- airing far above the deck of the pipe. Pop, when a rider makes movements to get into the air and go big.
Box or Platter	A box is a general term describing a wider sliding surface. A box style feature may or may not have sides that actually make it a box. A box with just one center support underneath a wide sliding surface may also be called a platter. Often the sliding surface of a box or platter is made up of skatelite, masonite or a hard plastic.
Busting	Throwing down a mad trick. Performing a manoeuvre, going big, and looking cool.
Butter Box	The Butter box is a big rectangle of snow built solely to jump onto it, slide or butter across it, then jump off. Most butter boxes have a take-off, a gap, the box (with a slight curved shape to enhance the landing and take-off on the Butter box), then another gap to a landing. They are super fun and hold potential for a huge variety of twirling, pressing and buttering manoeuvres.
C Box or C Rail	A box or rail with a C shape. The curved rails and platters are so fun and have their own feel. It takes time and progression to gain confidence with this type of feature. Once mastered a rider might do any trick or variation they would on a straight feature.
Cannon	A cannon is a box or rail set up on the end of, and off the back of a jump take-off. The box or rail will hang out over the deck of the jump and the feature matches the trajectory that a rider would take if it was just the jump by itself. The rider slides the cannon and then blasts off of it with speed enough to clear the jump deck and land on the jump landing.
Deck	1. The top horizontal portion of a halfpipe wall, past the lip, where one can "deck out" while riding a pipe or ride alongside the lip and drop in. 2. A walkway to hike to the top of a halfpipe. 3. The flat portion of a table top or stepdown between the lip and landing zone. Also known as a rollout deck.
Deck out	While riding up a pipe wall, airing out onto the deck.

Term	Definition
Decks	The decks are at least a cat wide (about 20-30 feet) on each side of the lips of the halfpipe. Each time the halfpipe is cut you lose 6 inches of width, more or less depending on condition of halfpipe. So, it is important that the decks are nice and wide when the pipe is built, so that the pipe will last the winter.
Double barrel	Two above mentioned rails, conjoined, fused together.
Down Rail or Down Box	A box or rail meant to simulate an urban style handrail. Usually set up so that the rider will jump onto the rail or box from the side instead of over the top.
Drop In	Usually just a high spot or mound at the top of the pipe that serves as both a drop in to gain speed for dropping into the halfpipe and as a staging area for the line-up of usual traffic or for an event.
Dropping/Dropping in	The act of starting your approach to a feature. What you say to your fellow parkmates as a courtesy and way of queuing up who's next when the park gets a little busy. Don't bogart someone else's drop.
Feature	All the man-made goodies available in the park-each rail, box, jump, spine, halfpipe, quarter-pipe, picnic table, etc., is an element or feature available to ride or jib on.
Flat bar	A rail with a rectangular shape, lengthwise. The grinding side of the rail, usually a minimum of three inches wide.
Flat Bottom	Although it is called the flat bottom, when a pipe is cut at its very best, as it would be for a big event or demonstration, the flat bottom is a smooth round arc that blends the two wall transitions, as in the diagram above. However, when it is not a contest cut, most pipes do have a fairly flat bottom and often a little bit of a kink where the flat bottom meets the cut transition. This kink is called a gutter because it resembles a gutter on the side of a street.
Flat-bottom	The area of snow between the transition of a halfpipe.
Frontside Hips	Hitting a hip frontside requires around 45-100 degrees of frontside rotation. It looks and feels somewhat like a frontside air in the halfpipe. However, the take-off can be a little tricky. Depending on the shape of the take-off, a frontside air is often done slightly off the heels. This is due to the fact that the rider must take-off towards the landing, which is to the side and may require a heel take-off. Again, feels a little weird, but you can get used to it, and boost.
Fun box	Usually square or rectangular, slightly higher than snow, and wider than a rail.
Grab	A general term for the variety of moves where the rider intentionally uses a hand to grab their board(s). These add style to the rider's manoeuvre and can actually enhance balance and/or spin control. Listen for terms like tip, tail, mute, indy, toxic, safety, japan, stalefish, and others to name grabs that describe specific grab combinations.
Halfpipe	A snow structure consisting of opposing radical transition walls of the same height and size. Ditch-like feature running down the fall line with a relatively flat bottom, transitions on both sides, and a rollout deck. Riders travel back and forth from wall to wall while moving down the line (sample of a halfpipe pictured right).
Halfpipes	Having become more and more common at the bigger ski resorts across the country, halfpipes have progressed by leaps and bounds over the past 15 years. 15 years ago a halfpipe was just a pair of banks with highway hits or little kickers to launch off of. They were all different. Some had turns, some had lift towers growing out of the wall, some had built in quarterpipes at the bottom and they were all fun, for their day. Today the halfpipes are immaculate. Becoming more uniform the pipes of today are cut with refined transition shaping machines attached to

Term	Definition
	snow cats. Unlike the skate ramp, builders are constantly battling mother nature in the attempt to provide a finished product that will be easy to maintain and last through the winter.
Hand Rails	In the Urban setting, hand rails are everywhere. It is the challenge For the urban rider to find creative ways to get speed for hand rails set on stairways around the city, or in random and unusual locations.
High Rail	A high rail is just that, a high rail. Commonly set up with a larger gap onto it the high rail requires good speed judging skills and total confidence. Coming up short jumping onto a high rail could end your season real quick.
Hip	Like a spine, but with a distinct take-off ramp and landing zone.
Hips	Take a big hip, with a landing which starts as little as right behind the take-off and has a sweet spot that goes for 50-60 feet along the top of the hip landing. You can start really slow and just make it off the thing, then go faster and faster hit by hit. Starting a little higher each time. Until you are flying into it. It is such a fun process. I have had some of the biggest airs of my life off of Hips and I'm sure I am not the only one who feels that way. A hip is basically a jump take-off with a landing that goes off to the side in relation to the trajectory of the rider. Some hips are set up like the diagram above where they have a take-off and 2 landings. Most of the time though in parks and in the back country hips have a take-off and 1 landing, either to the right or to the left. In the backcountry, you will find them where there is a gully that is banked on the sides. Coming from either inside the gully or from on top of the ridge a hip take-off may be built to send the rider skyward, then land back inside the gully on the bank.
Hit	Jump.
Hucking	Associated with throwing your body into the air-big air, perhaps beyond one's skill level. Huckers may or may not lack skill, but don't lack fear. A huckfest is where there is a quorum of huckers hucking.
Jump	Bump of some sort or table top that can be used to catch air.
Kicker	The jump's ramp. Specifically, the take-off area. Also known as a booter.
Kink	Combinations - Up Flat, Flat Down, Flat Down Flat, Down Flat Down, Up Flat Down, Up Flat Down Flat Down
Knuckle	The top of the landing zone on a table top jump. Also called the crown of the landing.
Landing/landing zone	The area of a jump that includes the landing and the runout where rider lands after having completed their manoeuvre and are still moving at high velocity. Not the ideal place to hang out in a park. Also known as a pillow.
Lip	1. The top of the take-off ramp of a feature. 2. The lip of the halfpipe is essentially the corner or knuckle made between the wall and the deck of the halfpipe. Focus on the lip is essential in the timing of release into tricks.
Manoeuvre	Your trick, jib, air-time, grab, or whatever mad, stylistic thing you throw down between take-off and landing. Simply put, what a rider does to look cool after leaving the snow (take-off zone) when using a terrain feature.
Quarter-pipe	A half U-shaped transition, facing uphill. Commonly found at the bottom of a halfpipe or on the sides of table tops.
Rail	1. Short for handrail. Any piece of material set up to slide on. Can be made of wood, metal, or plastic. 2. A rail is a metal sliding surface that the rider will hop or jump onto to slide or grind.

Term	Definition
Rainbow Rail or Box	A rail or box shaped like a rainbow.
Riding	Generic term to describe what skiers and snowboarder do.
Roller Coasters	A Roller Coaster rail or box is like a rainbow into a jump or kicker type transition at the end. It is like an S on its side, and allows the rider to do all kinds of spin or even flip tricks off the end of the box or rail.
Rollers	1. Series of undulations. Also known as rhythm section, camelbacks, camel humps, and pump bumps. 2. Another common sight in boardercross courses as well as in parks are rollers. Usually set up in sets of 2-6 in a row, rollers are great fun. A rider may pump through the rollers or double them by airing from the front of one over the trough between it and the next, to land on the back of the second roller. Pumping, doubling and even tripling are all common terms and activities in a boardercross race to generate speed and attempt to stay in front or pass the competition.
S Box or Rail	A box or rail an S shape. C and S rails sometimes also have a little rise and fall mixed into the feature. This adds to the feeling being on a ride.
Single barrel	A rail in the shape of a single pipe.
Spine	A manmade snow feature resembling the shape of an oblong pyramid. The peak, is usually parallel to the fall line and the base has a smooth, radial transition to the immediately surrounding terrain. Comes to a point on the top, with two smooth edges leading up to the point. Jumping takes place where the take-off and landing meet.
Spines	Is a pair of matching transitions that usually puts the rider in the air straight over the spin to stall at the peak of hang time, then drop back down into the landing on the other side. Common in skateboard and BMX parks, they are also great fun on a snowboard. Spines are usually 10-15 feet tall and can be set up across the fall line so that you hit it straight up and go straight over the top, or with the fall line so that you hit it from one side or the other, pause in the hangtime, then drop into the landing on the other side. Both types are commonly used as a feature on boardercross tracks.
Step Down	The step down jump became very popular for parks and big air jumps in the past decade. Many like the step down type jump more because the rider has more hang time and is further off the ground so it looks cooler or more dramatic. However, it does have a higher risk factor. If you come up short, you fall further before you hit the knuckle which increases chances of injury. Even if you hit the sweet spot, which can be perfect in pitch, grooming and stomp-ability, at touch down the impact and momentum are higher, which raises potential for injury, than the landing of a table top or step up. So it is important to learn tricks and develop confidence in your ability to land the move on your feet and in control before taking it to a step down jump.
Step Up	The step up style jump is so fun. It feels like you have to go really fast into it, to get up over the deck and make it to the landing. The step up jump is even more forgiving than a table and as a result amazing for learning flip tricks that you know you may not land on your feet. You only drop a little way to the landing so the impact is even less than on a table. Whether you land on your feet or on your hip a step up landing feels like it "catches you" nice and soft.
Switch	Riding backwards, with the non-dominant foot forward. Also known as fakie, cab.
Table Top	A Table top jump is called that because the deck of the jump is flat like a table. The deck usually also begins right at, or just a little bit below the take-off of the jump. Table tops are great and are nice to learn tricks on because if you come up short you will not fall too far before you hit the deck or knuckle (curved transition from deck to landing) and if you land in

Term	Definition
	the sweet spot of the landing the landing will hit you fairly softly, so that if your off balance or not landing on your feet there is a lower risk of injury.
Tabletop	Has a take-off ramp, flat deck, and a landing zone.
Take-off	1. Movements that riders make to set them into a manoeuvre on any terrain feature. 2. The rider's action at a feature's take-off (see pop). 3. The point on a feature where the rider leaves the ground also known as the lip on a jump or the coping of a halfpipe. The part of a terrain feature that assists riders into the air or onto an alternative sliding surface.
Trajectory	The path the body will take through the air or over a rail.
Transfers	From yard to yard or roof to roof, if there is a sketchy transfer to do a rider with a wanting eye will find it, slay it, and maybe get a good photo or video clip out of it.
Transition	The arcing shape made by the wall of the halfpipe between the flat bottom and the lip or vert.
Transition/tranny	Can either be a take-off or landing zone. Transitions progressively arc from flat to steep, or steep to flat, and enable a rider to acclimate without great compression from the snow.
Triple barrel	Three rails fused together.
Variety in Big Air with scoring	In Big Air the best 2 out of 3 jump format requires that the two scored tricks must be different. If a competitor performs the same trick twice or more during the same phase, only the highest score will count, and lower scores will not be considered. In order to differentiate between the different tricks they will be indicated with A, B or C on the TV graphics and results as follows: 1st jump: trick A performed: Judges Identify the trick performed and gauge the major characteristics of the trick. 2nd jump: trick B performed that must have different characteristics from trick A which the judges identify. 3rd jump: trick C performed that may have different characteristics from tricks A and B which the judges identify. In some cases, competitors execute only 2 different tricks, an A and a B and on the 3rd jump they repeat one of these tricks attempting to improve the score. In other cases, if they execute correctly tricks A and B, they will try to better the overall score by executing a more complex and difficult C trick, knowing that only the 2 highest scores of the 3 different tricks will count towards the final score
Vert	1. Steepest section of the wall in a quarter or halfpipe, angled to keep rider in the pipe. 2. The term vert comes from skating and describes the vertical part of the wall just below the lip. On a skate ramp there is actually a straight up and down vertical section at the top 1-3 feet of the wall. On snow though, you don't see that. If a halfpipe is truly vert, riders will be landing in the bottom of the transition and crying all day long. A snow halfpipe pipe should be between 2-4 degrees back from vertical, slightly more than the laid back lip of a Quarterpipe.
Wall Rides	Riders will build little jumps out of snow set up to launch a rider up against a wall so that they can slide it. Talk about hard on a snowboard.
Whale	Has a take-off ramp. The deck rises up and away from the take-off, then rolls down to create the landing zone. Looking from the side the take-off looks like the tail and the knuckle is where the blowhole on a whale would be.

Ski Cross and Mixed Team Ski Cross

Term	Definition
Air Time	The time from the take-off of the jump until the landing.
Arm guard	A specially designed cover that protects the arms from falls and from hitting the gate poles.
Back protector	A specially designed cover that protects the back from impacts.
Bank	An inclined curve out of snow which helps to make a turn.
Big final	The final round of a ski cross competition.
Blocking	Purposeful preventing a faster competitor from passing, by turning or preventing the line.
Body armour	Anatomically designed special equipment that protects certain body parts.
Boot height	The height of the heel or sole of the boot from the bottom of the boot.
Brackets	A group of four competitors that are selected to compete against each other.
Change of direction	Crossing the fall line twice.
Coloured bibs	Red, Green Blue and Yellow bibs.
Colouring	A liquid that is used to mark different parts of the course to increase visibility and provide information about the coming features.
Corner jump	A jump with a sharp turn on landing.
Countdown clock	A digital light display used to count down the time before the next start sequence.
Course design	A detailed plan of the layout of the course including the number of features, changes of direction, safety measures and finish area.
Course designer	An individual who considers the natural features of a slope and prepares a drawing and construction plan for the course using these natural features together with additional artificially created temporary features.
Course length	The measured length of the course in metres from the start gate to the finish line.
Course testing	A series of runs before the official training which determines the suitability of the course for competition.
Determination of winner	Crossing the finish first or reaching the furthest down the course.
Disqualification 1	Missing a gate, will be ranked within the round as last place.
Disqualification 2	Will be marked as DQB, but not ranked, caused by unsportsmanlike behaviour.
Draw	A random sorting of the different seeded groups to determine the start list.
Fall line	An imaginary line that follows the steepest gradient down a slope. (i.e. the path a rolling ball would follow down the slope).
Features	A series of natural or specially designed course elements on the course.
Finalist	A competitor who qualifies to compete in the final rounds of the competition.

Term	Definition
Finish area	The area directly after the finish line and before the exit gate. The area is for deceleration.
Finish line	A line which denotes the end of the run.
Finish referee	The referee responsible for determining finish positions.
First turn	The first change of direction after the start gate marked by a gate.
Flat turn	A turn with no jump or roll in any part of the turn.
Gate flag	A triangular panel held in place by a short pole (stubbie) on the short side and a longer pole on the other side.
Gate judge	A competition official that determines if the competitor has passed through the gate according to the rules.
Heat	A group of 4 to 6 competitors that has been determined by the seeding ranking, or by successfully advancing from a previous round.
Heat order	List of heats in the order in which they are run.
Holeshot	The competitor with the fastest start. That is the competitor that times his/her body motions with the exact timing of the opening of the start gate.
Inspection	A set time when the competitors can review the course from the start to finish. They need to have their equipment on including the helmet and bib. They cannot ski the course but must slide down and observe the location of the features and turns.
Interval	The set time between heats.
KO System	'KO' stands for 'Knock Out', which means a system that eliminates part of the field after each heat.
Land marks	Positions on the body for measuring the ski suits.
Landing	The steep slope that the competitors make contact with the snow after a jump.
Lane choice	Each start gate is colour coded and the competitor with the better rank in the seeding run chooses their lane/start gate first, 2 nd chooses second, etc.
LZ (Landing Zone)	LZ stands for Landing Zone, which is the probable location where the competitors will land, given speed of the section of the course, the size of the jump and the angle of the take-off.
Missed gate	Not properly passing thru a gate according to the rules.
Pass/passing	One competitor overtakes or moves past another competitor.
Photo-Finish equipment	An electronic line-scan camera aligned with the finish line, used to determine competitors' times and finish order.
Poling	Part of the upper body movements used to increase velocity.
Pro jump	See "step down" jump.
Protection	Plastic protection for various parts of the body (i.e. shoulders, arms, back, legs).
Roller	A "wave or series of waves" (gentle jumps) which the athlete can either absorb or jump.
Seeding	A ranking of the competitors based upon their world cup standings and FIS points.

Term	Definition
Seeding run	An interval based time trial.
Service area	A location on the course usually at the start, where the service personal prepare the skis.
Service tech	A service person that prepares and maintains technical equipment.
Sintered Base	High molecular-weight ski base formed by the heating and compression of small fragments of P-tex. Sintered bases absorb and hold wax better and are more durable than extruded bases, i.e. they are faster.
Skating	Lower body movement where the competitors put the skis on the edge and push off to increase velocity.
Ski marking	The process used to identity the skis that can be used in competitions.
Ski preparation	The preparation of the base and ski edges to increase performance.
Ski suit	Shall be made of two pieces, pants and top and worn over the body armour.
Skiing line	The fastest line around the gates.
Small final	The heat that decides the ranking for 5 th to 8 th place.
Snow Seed	A group of competitors selected from those with low seeding ranks, who start before the first competitor on the start list, when the jury has decided that excess loose snow on the course would disadvantage the early starters
Snow temperature	The surface temperature of the snow measured in degree Celsius.
Start commands	Three separate announcements are given, with different instructions at each start phase. The start command is "Competitors Ready", "Attention!!"
Start gate	A mechanical device with an opening system, handles.
Start handles	10cm long horizontal posts which are 95cm above the snow located on the start gate, so that competitors hold onto them to gain some mechanical advantage once the gate opens.
Step Down Jump	A jump where the landing is lower than the starting point.
Step Up Jump	A jump where the landing is higher than the starting point.
Table	A jump where the landing is on the same level or a little higher than the kicker.
Traverse	Travelling perpendicular to the fall line.
Tucking	Taking an aerodynamic position by reducing the frontal surface area.
Turn around time	The total time it takes to start and complete a run and arrive back to the start area.
Vertical drop	The total difference expressed in metres from the start elevation to the finish elevation.
Video control	The viewing of live video image of the competition course and watching for pushing pulling, grabbing, blocking and missed gates.
Waxing	Application of substances to the base of the skis.
Yellow flag	Used by the gate personal to indicate that there has been an obstruction on the course.
